WORK EXPERIENCE

Web Developer and Digital Marketer Scribe On Demand

06/2021 - Present Richmond, VA

A full-service content marketing agency that builds brands, establishes thought leaders, and creates audiences.

Achievements/Tasks

- Fully built/developed and designed company website (scribeondemand.com).
- Helped both Scribe and its clientele with personalized SEO reports.
- Assisted in identifying relevant content ideas to successfully market both Scribe and its clientele.

Intern Scribe On Demand

06/2020 - 06/2021 Glen Allen, VA

A full-service content marketing agency that builds brands, establishes thought leaders, and creates audiences.

Achievements/Tasks

- Planned out and started their website's design and development.
- Helped with citation editing and invoicing.

Information Technology Intern James River Equipment

05/2022 - 08/2022 Ashland, VA

Achievements/Tasks

- Worked in a team as a help desk for company employees' software and hardware problems.
- Imaged and set up computers for employees.
- Completed various tasks like inventory, shipping, organizing, etc.

SCRUM

CODING PROJECTS

Recipe Matchmaker Web Application

- Web application that tailors recipes to individuals' ingredients, prep time, and preferences from almost 200,000 total recipes.
- Uses a Next.JS frontend and FastAPI backend to handle the data.
- URL: recipematchmaker.com

Fantasy Football Ranker

- Python program that uses neural network machine learning to rank NFL fantasy football players within their respective positions.
- Excluding injuries, has a more accurate prediction for previous seasons than main human rankings or other popular computer algorithms.
- GitHub: <https://github.com/VinGuar/Fantasy-Football-Rankings-With-ML>

NBA Player Grader

- Python program that uses ridge regression machine learning to find which NBA stats predict wins best and then grades current/past NBA players.
- Has a very strong correlation between high player grades and high team win totals.
- GitHub: <https://github.com/VinGuar/NBA-Player-Grader-With-ML>

Personal Website

- Fully coded, built, and designed my own personal website with Next.JS to house my portfolio.
- Link to website: vincentguarnieri.com

VOLUNTEERING

Interactive Digital Map for the Woodland Cemetery (02/2022 - 04/2022)

Led a team that coded a fully functioning digital map that helps family members easily find their loved ones at the famous but underfunded Woodland Cemetery. Employed SCRUM to effectively communicate with the client and manage the team.

RVA Access (05/2017 - 08/2022)

Play soccer and hang out with children with special needs to encourage their social development and build their self-confidence.
